## Claims

- 1. Rolling device (1) for a defective wheel (2) of a motor vehicle, comprising a carriage (7) provided with rollers (4) onto which the defective wheel (2) can be driven and on which it rests, as well as 5 comprising a fixation device for the wheel (2) on the carriage (7), characterized in that as a fixation device a belt (9) is provided that is connected to one end of the carriage (7), wherein for driving the wheel (2) onto the carriage (7) the belt (9) is placed 10 such onto the ground (10) that the wheel (2) when driving it onto the carriage (7) rolls on the belt (9) along the extension of the belt, and wherein, when the wheel (2) rests on the carriage (7), the belt (9) can be placed, counter to the direction of placement onto the ground (10), across the wheel (2) and connected with its free end to the other end of the carriage 15 (7).
  - Rolling device according to the preceding claim,
     characterized in that
     the belt (9) with its free end can be hooked onto the carriage (7).
- Rolling device according to one of the preceding claims,
   characterized in that
   the belt (9) can be adjusted with regard to length.
  - 4. Rolling device according to one of the preceding claims, characterized in that a ramp (6) for the carriage (7) is provided wherein the belt (9) placed onto the ground (10) extends either underneath or on top of the ramp (6).
  - 5. Rolling device according to claim 4,

25

characterized in that the ramp (6) is embodied separate from the carriage (7).

 Rolling device according to claim 5, characterized in that the ramp (6) can be hooked onto the carriage (7).

5

- Rolling device according to claim 6, characterized in that the ramp (6) can be hooked onto an axle (8) of the carriage (7).
- 8. Rolling device according to one of the preceding claims,

  10 characterized in that
  the carriage (7) is comprised of a bottom part (3), in particular made of sheet
  metal, having the rollers (4) and of a top part (5), made especially of plastic
  material, arranged on top of the bottom part.
- 9. Rolling device according to one of the preceding claims,
  15 characterized in the
  the carriage (7) has three rollers (4).
